## Search for new president begins

### SJSU will host five candidates

By Tim Schwalbach  
Spartan Daily Staff Writer

Three years ago, J. Handel Evans became SJSU's interim president after a search for a permanent president failed. Now, the search for a new president is underway.

A presidential search committee is responsible for finding the candidate who will be chosen by late December.

The search committee is comprised of 14 members who represent the SJSU campus community. It includes faculty, alumni, staff and student representatives. Three trustees and one executive vice chancellor, who is appointed by CSU Chancellor Barry Munitz, are included.

"The four of them are the really important ones because they're going to take the recommendation to the full board of trustees who will then make the final decision," said Terry

Christensen, professor of political science and a member of the search committee.

Since June, the committee has convened and taken steps to solicit and search for presidential candidates who would like to become SJSU's next president.

There are three ways the committee goes about searching for applicants. The first method is by advertising.

These ads can be seen on bulletin boards throughout campus and the chronicle of higher education.

Next, brochures are given to interested applicants who inquire about the job.

Finally, there's a professional search firm employed by the chancellor's office. Their job is to find candidates who might not hear about the job in any other way.

## Minorities increase

### Campus diversity improved over past four years

By Michelle Maitre  
Spartan Daily Staff Writer

Even though campus-wide enrollment has plummeted in the wake of 1992 state budget cuts, minority enrollment is on the rise, creating a more diverse campus.

According to SJSU's Office of Institutional Research, minority enrollment has actually

increased by 553 students since 1990, despite the fact that enrollment as a whole has declined by over 3,200 students.

The reason for the rapid decline is that budget cuts have forced California State Universities to cut staff and teachers, thus limiting the number of students universities can accommodate, said Dennis

Armstrong of the CSU Office of Public Affairs.

"That's one of the real attractions of the university, that we have such a diversity," said Jack Williams, director of institutional research. "People of all backgrounds, languages and cultures come together."

Since 1990, enrollment of Filipino-American students has

increased 12 percent, and Asian-Americans, the largest represented minority group at SJSU, have increased enrollment by 0.3 percent. The largest increase, however, was among Latino students, who have grown by 498 students—almost 21 percent since 1990.

## Scheller House loses its ground

By Joanne Griffith Domingue  
Spartan Daily Staff Writer

Time has almost run out for the historic Scheller House on San Carlos and Fifth Streets, a building that's a treasure trove of leaded beveled windows, parquet oak floors and coved ceilings.

The 5,700 square-foot house, built in 1904, must be demolished or moved by Sept. 30. That's when construction is scheduled to begin on the San Carlos Street project which includes landscaping a pedestrian walkway and constructing a new science building.

The university cannot deviate from that start date without incurring penalties, said Alan Freeman, SJSU director of space management and facilities planning.

"We attended 56 meetings over three years to try to save the house," said Dean Batt, SJSU vice president for student

affairs. "I would love to have it moved."

As of Tuesday, no viable plan for moving the house was in place. By Thursday, preparations for either moving or demolishing had begun.

The future for the Scheller House looks bleak. At their Tuesday meeting, the San Jose City Council turned down two proposals to move the house. One came from Barry Swenson, a San Jose builder, and the other from Tony Marine, a Santa Clara preservationist.

Mayor Susan Hammer questioned if the city should be involved since the university owns the house and already has a contract with Tim Lantz, a Morgan Hill contractor, to move or demolish the house. In 1993, Lantz won the grand award from the National Trust for Historic Preservation for his work restoring a home in Los

JEANETTE HANNA—SPARTAN DAILY

The City Park garage offers 200 spaces.

## Parking salvation arrives for frustrated commuters

By June Pratt  
Spartan Daily Staff Writer

At least 200 San Jose State University students can enjoy the luxury of a guaranteed parking space this fall without the hassle of parking on campus.

The parking is available in the five-story City Park garage at the corner of East San Carlos Street and South Second Street. Of the 586 spaces in the garage, 200 will be offered to SJSU students who are registered for six or more units.

Students can use the garage on a 24-hour basis.

"We want more students to explore downtown and get to know the amenities there," said Beth Trask, communications manager at the San Jose Downtown

Association. "The parking's a good deal."

Students like Steve Kevin, an SJSU physics major, who lived in the downtown area, still prefer to fight for parking. He said that the city garage is at one of the hubs of downtown activity and its monthly rate of \$30 for students is \$10 more than campus garages.

"For 30 bucks a month, I'd rather shoot and scrounge for a parking space," he said.

Jennifer Velasco, an SJSU education credential applicant, said the garage used to be free for students at night, but she never felt comfortable there.

SJSU art major James Bonacci agrees with Velasco.

See **Garage**, page 8

## "Information superhighway" may become California policy

### Ratification of bills would connect schools in Golden State

By Nancie Gruber  
Spartan Daily Staff Writer

"Ease on Down the Road" may take on new meaning for California's student population if two bills pending in the state legislature are passed.

If the bills are approved, "the information superhighway" could link 7,600 public schools, 29 state-run universities, 107 community colleges and 800 public libraries to the national and global information infrastructure. This would be done through the Golden State Education Network (GSEN), according to the California State University Board of Trustees.

Proposed by a coalition representing

education, business, libraries, government and private entities, GSEN would become part of state policy if Senate Bill 1960 passes.

Funding would be provided by the passage of Assembly Bill 950, which would add a 1 percent surcharge to the telephone bills of all Californians, according to Karen Yelverton, CSU director of state policy.

Estimated cost to build the system is \$1.5 billion, and the surcharge would raise \$150 million annually, Yelverton said.

GSEN would "probably be phased in over a five to 10-year period, depending

## The word from Elysium

## Save the Earth or you can kiss my meteor

Kevin Moore  
columnist

A long time ago in a galaxy ... well, not so far away actually. This one, in fact.

Right here on good old planet Earth, one day a great big rock (about six miles across) fell out of the sky and exterminated about 80 percent of all life in the world.

Gone, kaput, extinct. This global catastrophe was part of the natural growth and evolution of Earth.

The current devastation of Earth's biodiversity is not.

Between deforestation and global warming, which has already cooked about a third of the world's marine coral reefs, a greater number of species has been destroyed by the hand of man than by the dinosaur-killing meteorite.

The current species' annihilation is virtually all because of the destructive hand of humanity. It is not a natural part of the world's growth and evolution.

But ... gently twinkling, feeble and disparate, against the dark night of total extinction are the lights of desperate but dedicated organizations like the Conservation Trust on the Isle of Jersey.

Several species owe their continued existence to the people who work, underfunded and often in total ignorance of a species' needs, to preserve species that have disappeared

entirely from the wild.

It is a sad statement that the last remaining animals of a particular species exist only in a cage, but, without captive breeding they would not exist at all.

Even with an army of non-profit organizations doing full-time collection of, and research into the needs of vanishing animals, the forces behind extinction are pulling ahead farther

*Imagine a terrarium in your living room filled with sky-blue frogs.*

and faster every day.

Species are disappearing faster than they can even be found, let alone bred.

The main problem with the nonprofit organizations like the Conservation Trust and various zoos is that they are underfunded and overworked.

As charities, this situation is unlikely to change in the near future.

What is needed to gain ground on slash-and-burn farm-

ers, loggers and anyone else forced into destructive behavior for the sake of their own immediate survival, is a twinned public relations push and reform of the exotic pet industry.

It is essential to make dogs, cats and goldfish, et cetera, unfashionable as household pets.

The pet industry must be provided with both the ability and the incentive to maintain large breeding populations of endangered or extinct animals, and keep them in good health.

If it's profitable, they'll do it, and save more of the world's animals from disappearing than is now likely.

The P.R. could start out with slogans like "Have you kissed a toad today?" or "Iguana hug a lizard."

People would be encouraged to adopt a species to raise for their own enjoyment.

Imagine a terrarium in your living room filled with sky-blue frogs. Such a heavy price to pay for saving a species.

Kevin Moore is a Daily columnist. His column will appear every other Wednesday.

## Writer's Forum

## "Correct" speech leaves sour taste

Nancie Gruber  
staff reporter

Ridding our speech of racial slurs, ethnic epithets and terminology that debases women, homosexuals or the aged is a noble goal. There is no place in a democratic society for language that demeans people and perpetuates stereotypes.

But what began in the 1980s as a movement to create a better society by eliminating stereotypical language has stretched into a verbal tightrope on which even the silver-tongued have trouble keeping their balance.

The original intent of politically correct speech is being submerged in a sea of euphemisms that range from the bizarre to the ridiculous to the harmful.

For example, under the umbrella of politically correct language, it could be said that Richard Nixon was "ethically disoriented," Oliver North told Congress "categorical inaccuracies" and Charles Manson is "socially misaligned."

Environmental groups even subscribe to politically correct speech. Case in point: We no longer have swamps and jungles, but instead have "wetlands" and "rain forests."

Do they think people will support efforts to save these ecosystems only if they have exotic-sounding names? Good causes speak for themselves and don't need to be "linguistically enhanced."

Journalism, too, has embraced the PC phenomenon. The Los Angeles Times, for example, prohibits its writers from using the term "gypsy" for fear that gypsies will be offended.

Also banned by the Times is the phrase "welshing on a bet" as well as the obviously "Dutch treat."

What's next? Are animal rights activists going to tell us that sports teams can't have names like Lions and Tigers and Bears anymore because it's demeaning to animals?

How about the California Angels and New Orleans Saints? Is the religious right going to say it's sacrilege to give sports teams heavenly names?

It's clear that referring to bald men as "follicly impaired" or senior citizens as "chronologically gifted" is not meant to be taken seriously. But how far are we going to carry this linguistic nightmare?

It has become so absurd that even the term "politically correct" is no longer politically correct. The new term is "culturally sensitive."

But the great irony of this new "sensitivity" is that when it's taken too far, it numbs people to reality and does more harm than good. The quintessential example is describing what has gone on in Bosnia-Herzegovina as "ethnic cleansing."

The carnage that has taken place there is nothing short of genocide, yet politicians and the media have buried the truth in euphemism. Perhaps if they called the situation what it really is, something would be done about it.

Manipulating language can't change the facts. Saying that someone is "visually challenged" won't get the person's sight back, and calling shock treatments "electroconvulsive therapy" does not diminish their inhumanity.

Instead of applying politically correct language to every facet of our lives, it's time to evaluate some of its negative effects.

## Writer's Forum

## Driving tax emits polluted thinking

A.J. Nomai  
staff reporter

Our State congress has a good idea, but as usual, it is not fully-developed. The idea is a noble one, to impose a tax of half-a-cent on every mile you drive your car.

This tax will do nothing more than raise revenue when it could do something much more beneficial for society. The tax has the ability to leave something future generations can enjoy.

That something is clean air.

Proponents say the tax on miles might get people to drive less, resulting in less air pollution. At least their political heart is in the right place.

But this tax does nothing to address the source of pollution and offers no incentive to reduce auto emissions — something a tax of this type aims at.

Under the current tax proposal, the only hope of lowering smog emission levels is by getting people to drive less.

Recent reports, however, indicate that the number of people using public transportation is edging down. With that in mind, it is not realistic to expect that people are going to abandon driving to escape taxation.

Instead of taxing the miles driven, the tax should be directed at the emissions. The taxation

would become fully-developed with that change.

By taxing emissions, the less smog emitted by the vehicle, the lower the tax. This lower tax incentive could inspire people to buy more fuel efficient cars, thus reducing smog without giving up miles driven. In effect, you have two options to reduce your tax bill: buy a car that pollutes less or drive less.

The emissions tax is also more equitable than a miles tax. It is only fair that people who pollute more pay for the damage they do to the environment proportionately.

It's undisputed that some sort of tax is needed. Badly damaged freeways need repairs; monetary backup should be available to help rebuild the roadways after the next big earthquake.

We should not look to taxation for taxation's sake and hope clean air is a convenient side effect. Clean air should be central to the tax.

These past few decades, our behavior has taken more and more away from future generations. More oil, more land, more money ... let's at least leave them some clean air. Instead of imposing taxes strictly for the purpose of raising revenue, why not have it help clean the air.

## Letters to the Editor

Dear Editor:

Where did the summer go? I ran out of time over the summer.

I just wanted to let you know that I still have every intention of keeping my promise in writing to each and every one of your advertisers to let them know how your paper is using their dollars to vent your personal anti-gay hate.

I will make it very clear to them how much offense gay people take to this support.

I will make it very clear to them how gay people have lots of disposable income.

I will make it clear to them that for every business that chooses to support this kind of hate, there are plenty of gay-friendly businesses where we can spend our money.

I will make it clear to them and to the Spartan Daily that it is no longer safe to attack gay people without fear of them fighting back.

Ron Gardner  
Graduate, education

## Opinion page policies

The Spartan Daily provides a daily forum to promote a "marketplace of ideas." Contributions to the page are encouraged from students, staff, faculty and others who are interested in the university at large.

Any letter or column for the Opinion page must be in the Letters to the Editor's box in the Spartan Daily newsroom, Dwight Bentel Hall 209, or left at the information booth in the Student Union.

Articles may also be mailed to the Opinion Editor, the

Spartan Daily, School of Journalism and Mass Communications, San Jose State University, One Washington Square, San Jose, CA 95192. Fax articles to (408) 924-3237.

Articles and letters MUST contain the author's name, address, phone number, signature and major.

Contributions must be typed or submitted on a 3.5-inch disk using Microsoft Word on the Macintosh. Always bring a printout of your submission.

Submissions become the property of the Spartan Daily

and will be edited for clarity, grammar, label and length.

Categories available to non-Daily staff members are:

■ Campus Viewpoint: 300 to 500 word essays on current campus, political or personal issues.

■ Letters to the Editor: Up to 200 words responding to a certain issue or point of view.

Opinion pieces written by staff writers or editors do not necessarily reflect the views of a majority of the staff members of the Spartan Daily.

## Artists wanted for political cartoons

The Spartan Daily is searching for a few good artists to display their wares on the Opinion page. Please submit five political cartoons with your name and phone number to Dwight Bentel Hall, room 209.

Artists must have good drawing skills, keep up

with current events and have strong positions on issues.

The deadline is Friday, September 9. Drawings will be reviewed by the editors and current artists. Artists will be notified by phone.

## Gene linked to inherited melanoma

NEW YORK (AP) — Defects in a gene that normally acts as a brake on cancer may cause an inherited tendency toward the skin cancer melanoma, scientists reported today.

People who inherit a defective version apparently lose part of the anti-cancer protection, making them unusually vulnerable to melanoma, the researchers say.

About 32,000 melanoma cases and nearly 7,000 melanoma deaths are expected in the nation this year. Only about 10 percent of melanoma occurs in people with an inherited tendency, and it is not clear what percentage of inherited cases are due to the gene.

Defective versions of the gene may also be involved in many or most cases of non-inherited melanoma, researchers said. In these cases, it would be inherited in normal form but later damaged by sunlight or other causes.

Studying the gene may eventually lead to better treatments for the non-inherited disease, researchers said.

More immediately, the discovery of a susceptibility gene could be used to screen for people at risk for melanoma, who could be counseled to take steps like avoiding too much sun, keeping track of possibly pre-cancerous moles and using sunscreen, researchers said.

The normal gene tells the body how to make a protein called p16, which helps regulate cell division. Prior studies suggested the p16 gene is a so-called tumor suppressor that discourages development. Previous studies also indicated defective versions play a role in cancer.

The new work is reported in the September issue of the journal Nature Genetics by two independent teams of researchers.

## Luxury Transportation for SJSU Students

It's time to use transit; you don't want to be late to class.

You can enjoy this program by using your SJSU school I.D. starting August 29. The new Transit/Enrollment cards will be sent to you through the mail. Your school I.D. will be good for two weeks until the Transit/Enrollment card is sent. After that go to Admissions and Records.

All students must have paid their registration fees before obtaining this card.

The card looks like a regular I.D. card but with a different color and an expiration date that covers two weeks into the spring semester, so students can continue to use them through the Winter break.

**Regular, Light Rail, Express and Paratransit services will be provided to all students 365 days a year.**

For planning a way to school and work contact Altrans Organization: **924-RIDE**

For additional information call Alfonso De Alba (Transit Access Program Coordinator): **924-6243**

This program designed for students will last for two years and before this trial period is completed, the students will have an opportunity to extend it by general election vote. If the students decide to stop their participation in this program, the last day of service to be provided will be August 28, 1996. The contract agreed by the Associated Students and the Transportation Agency define the purpose to be: *The prepayment of basic fare to permit SJSU students to use public transportation provided by the District (TA) during the following two years.* Neither the Associated Students nor the Transportation Agency is creating a new type of service or program since the scope of service will be the same and the prepayment services have been a commodity provided by TA to its riders through TA monthly and semester flash passes.

Sponsored by Associated Students and in part by the Traffic & Parking Operations

## Spotted owl still perched on endangered species list

WASHINGTON (AP) — The Interior Department today rejected the timber industry's bid to remove the northern spotted owl from the list of threatened species in California.

The bird remains at risk in the Pacific Northwest despite evidence that its population in California is greater than once thought, the department's Fish and Wildlife Service said.

"With some exceptions, the species appears to be well distributed across much of its historic range in California, including areas where extensive timber harvest has occurred in the past," the service said.

But the northern spotted owls in California cannot be considered separately from spotted owls in Oregon and Washington, the service said. In considering removal of a species from the list, the service says it must weigh the population of the owls in the species' entire range.

The service listed the bird as threatened under the Endangered Species Act in 1990.

# Continuing a bitter rivalry

By Jim Seimas  
Spartan Daily Staff Writer

John Ralston and Jim Sweeney sit in cushioned chairs in their offices. They both let their minds rekindle war stories. The battles they endured 35 years ago are told as though it were yesterday.

Ralston, the San Jose State Spartans coach, and Sweeney, the Fresno State Bulldogs coach, are leading different teams since the first time they squared off. But three and a half decades later, the stage is again set.

The Spartans (2-9, 2-4) open their season when they travel to Bulldog Stadium for a 7 p.m. preseason brawl with Fresno (8-4, 6-2) on Saturday.

"We're among very best friends. I hope he wins every single game this year, except one," Sweeney said.

The Bulldogs moved over to the Western Athletic Conference (WAC) two seasons ago after tying with the Spartans for first place in the Big West Conference.

"It's just nice to have the rivalry continue," Ralston said.

The Bulldogs take on the Spartans five days after 34-10 loss to national powerhouse, No. 20 Ohio State (10-1-1, 6-1-1).

"I say that Ralston and me combine Fresno and San Jose and take on Ohio together," Sweeney said prior to the loss.

SJSU leads the series 32-24-3 in their 59 meetings, but Fresno has won three of the past four matchups.

Both teams suffer from losing key players to graduation, including starting quarterbacks.

Ralston feels Fresno has a clear advantage in recovering.

SJSU lost Jeff Garcia to the Canadian Football League and Fresno State lost the nation's top passer, Trent Dilfer, to the NFL.

Alli Abrew will take over for Garcia and Adrian Claiborne replaces Dilfer.

Claiborne, a 6 foot 3, 200-pound sophomore is said to possess excellent arm strength and is a dangerous running threat. He was clocked running a 4.66 40 during the spring.

Getting on the young quarterbacks early may be the key to the game.

Fortunately for Claiborne,

he'll be protected by a proven offensive line, which includes All-WAC center Jason James (6 foot 5, 305), now at right tackle, and Dan Han (6-4, 310) at guard.

"They have a big, strong, physical offensive line that will create some problems for us," Ralston said.

Fresno returns six starters to its defense and will hope to contain receivers Jacobbi Williams, Jerry Reese and the rest of the Spartans' mixed attack. Reese led the Spartans with seven touchdowns last season. He feels this will not be a defense-minded game.

"We're going to put up 35 points. We have an explosive offense. We're not aggressive. We wait for the defense to make a mistake, which will happen early in the season," he said.

"Playing Ohio is going to help Fresno more than hurt them because they'll have a game on us. But we have so many formations and they have no film on us. We got to watch them play," Reese added.

Now a senior, he played against Fresno his freshman year and is reveling at the opportunity to do so again.

"I love playing away — especially there. The crowd is booing you, seeing all that red," Reese said. "It's like nothing I've ever seen before — such a rivalry."

Sweeney said, "Our best attendance comes against San Jose State. We're going to fill the house."

PHOTOS BY FRANK CAVA—SPARTAN DAILY

In preparation for Saturday's match at Cal State Hayward, members of the SJSU soccer team scrimmage during practice Wednesday in

South Campus. The team will face one of their toughest opponents Tuesday when they face 12th-ranked University of San Francisco.

## Spartan soccer eyes coveted playoff berth

By Makonnen Gebrehiwot  
Spartan Daily Staff Writer

Only a winning season will salvage past shortcomings and silence critics' doubt regarding the steady improvement.

The SJSU soccer team failed to advance to the Mountain Pacific Sports Federation's playoff the past two seasons, finishing with an identical 1-5-1 record.

This year, for the first time, there is a strong sense of optimism within the team about its chances of contending for the title and securing a playoff berth.

Experience, depth and good recruiting are the main reasons behind fifth-year Coach Gary St. Clair's confidence that his new team will go far this season.

"This is the best talent we have in four years. In addition to the eight experienced seniors who will be returning, we have three promising recruits which have already showed us signs they can make us a better team," St. Clair said.

"We have continued to show progress each year. Last season, we finished with our best overall record in a decade," he added.

Disappointed at how their Wednesday practice went, Coach Gary St. Clair disciplines the team members.

"Now we have the opportunity to build on our success, and we do not intend to let that chance slip by."

The change of attitude is echoed equally by the players.

Brian Weaver, the team's top scorer who is picked to the All Far West Conference team, said he feels confident with the current team.

"Our offense will have three players with 10 goals between them," Weaver said. "The addition of Joseph Stewart at full-back, Espen Sora at midfield, and Dominic Sposeto at forward will definitely increase our

chances of making the playoff this season."

St. Clair points out mental toughness and consistency will be the factors that will decide the success of the team.

"We have good talent. The challenge is for our players to go out week after week with the same determination and win-

ning attitude," he said.

St. Clair speaks with certainty that the dark days of the soccer program are over and it is time to reflect toward the future.

"When I came aboard, the program did not offer a quick fix. After four years of hard work, I am glad to be around to see our effort is paying off," he said.

"With a solid season we can both improve our recruiting ability and win support from the university community for next season."

The Spartans will open their season on the road tomorrow at 2 p.m. against Cal State Hayward.

The team's biggest test will come at the home opener next Tuesday at 7:30 p.m., when it faces the 12th-ranked team in the nation, the University of San Francisco.

### SJSU Soccer Schedule

date	opponent	location	time
9/3	Cal State Hayward	Hayward	2 p.m.
9/6	USF	Spartan Stadium	7:30 p.m.
9/9	UC Irvine Tournament	Irvine	7:30 p.m.
	SJSU vs. San Diego State		
	UC Irvine vs. Cal State San Bernardino

## Clinton limits pay raises

EDGARTOWN, Mass. (AP) — Millions of federal workers will get a slightly smaller pay increase than they may have expected next year.

President Clinton, while on

vacation on Martha's Vineyard, directed Wednesday that the pay raise for white collar federal employees be limited to 2 percent, instead of 2.6 percent as Congress had intended.

## Having a hard time getting classes?

### San José City College is still just \$13 a unit!

SJSU students can still register for the following transferrable courses starting throughout September:

CIS 41	Introduction to Computer Information Systems
Economics 10A	Principles of Economics
English 1A	English Composition
English 1B	English Composition
English 72	Creative Writing
English 73	Shakespeare
English 76A	Great Books
English 84A	Survey of American Literature
English 86A	Survey of English Literature
French 1A	Elementary French
History 1	Survey of American History
History 17 A	History of the United States
Humanities 2	Introduction to World Literature
Journalism	Writing for Media
Philosophy 60	Logic/Critical Reasoning
Political Sci 1	Politics and Government in America
Psychology 10	General Psychology
Social Sci 32	Japanese People, Behavior and Culture
Speech 20	Oral Communication

#### Plus more!

The above courses are being offered at South San Jose off-campus locations of Gunderson High School and Santa Teresa High School starting September 12th and 13th, and on the main campus during the Mini-Semester beginning September 26th.

## Deans: Facing tough challenges

From page 1

Donald Kirk, who is originally from Baltimore, Mass.

Kirk holds a doctorate in electrical engineering from the University of Illinois and a master's degree in electrical engineering from the Naval Postgraduate School. He also has a bachelor's degree in electrical engineering from Worcester Polytechnic Institute.

Kirk was on temporary assignment as a program director for the National Science Foundation.

Kirk said he wants to provide opportunities for students to prosper in this industry.

"I believe the College of Engineering has many opportunities to benefit from and contribute to the rebuilding of California's economy," he said.

#### Ego: Overcoming budget deficiencies, maintaining morale

Michael Ego may not be new to San Jose State but he is definitely new as dean of Applied Sciences and Arts here on campus.

This is Ego's sixth year at SJSU, and was appointed to his new position in January. He served as associate dean for four years and interim dean for about one year before taking over his new post.

Born and raised Los Angeles, Ego received his doctorate at the University of Oregon.

He recognizes his department is affected by recent budget cuts and said he would like to see classes expand while seeking different revenue sources to supplement courses for students. He knows there are obstacles to face but will try his best to keep the morale up and provide opportunity for continued growth in his department.

#### Selter: Creating a new image for the College of Science

An American Chemical Society

PHOTOS BY  
MARCIO SANCHEZ

LEFT: Dean of Social Work Sylvia Rodriguez Andrew, originally from San Antonio, Texas, has been living in California for about three months.

BOTTOM: Gerald Selter, an American Chemical Society Professor of the Year, takes over as College of Science interim dean.

BELOW: Dean of Applied Sciences and Arts Michael Ego received his doctorate at the University of Oregon.

Professor of the Year will be SJSU's new Dean of Science.

Gerald Selter will administer the College of Science programs including: chemistry, mathematics and natural science.

The new interim dean is widely published in his field and has received various grants.

Selter received his bachelor's degree in chemistry from Washington State University in Pullman, Washington.

"A new image of the College of Science is emerging," Selter said. "It shows that we are a link between an ethnically diverse K-12 potential work force and the highly sophisticated industrial and business complex of the Silicon Valley. Teaching is our mission, service to the community is our motto, excellence is our goal."

## Diversity

From page 1  
Gamma Zeta Alpha, a Latino-based fraternity that promotes academics and Latino culture, credits the rise to increased outreach.

"The clubs have been really teaching the community," he said. "Some people think education is not for them. Reaching out makes them think about the university in a different way."

The minority population growth at SJSU mirrors a trend in the entire CSU system, which has been attempting to diversify enrollment.

"We're making an active effort to change," said Dea Nelson with Student Outreach and Recruitment, a campus office

**'The whole state demography is changing, and if we don't change the participation rates, there won't be students in the colleges'**

Dea Nelson  
Student Outreach and Recruitment

that aggressively recruits students from area high schools and community colleges. "The whole state demography is changing, and if we don't change

the participation rates, there won't be students in the colleges."

Nelson added that as large as the increase of under-represented students has

been, the numbers are still "far from parity with our community."

Enrollment of other minority groups has been declining at SJSU. African-American enrollment has declined 5 percent from 1990, but is still 4 percent higher than it was in 1993. Enrollment of Pacific Islanders has declined 10 percent. The largest loss was among American Indian students, down 13 percent from 1990.

## House

From page 1  
Gatos.

Lantz would like to restore the Scheller House and turn it into a center for historical preservation, leasing space to nonprofit organizations involved in historic preservation. As of Tuesday, he did not have a place to put the Scheller House. He had made an offer on a site and expected to hear about it by Wednesday.

"I maintain my position to move the building up until the last minute," Lantz said.

If plans to move the building fail, "all items of artistic or historical value will be removed by the university prior to ... demolition," according to the July 1994 demolition specifications.

This ensures that treasures from the house can be saved.

Victor Scheller, the first district attorney of Santa Clara County, rented the house from his brother-in-law.

The Scheller House is "a community heirloom," said Lorie Garcia, vice president of the Santa Clara County Heritage Council. "It's never over until it's over."

## Search

From page 1

Not just anyone can quit their day job and apply. Certain qualifications have been established by the committee in order to assure students that they're getting a responsible president for their future.

"We'll be looking for people with academic, teaching and management experience," Christensen said. "We're looking for people who can do everything."

The only person who is definitely applying is J. Handel Evans, the current SJSU president. At the recent State of the University Address, Evans confirmed his candidacy.

"This year shows promise of being an interesting year. I intend to give the other presidential applicants a run for their money," Evans said.

The search committee will begin reviewing applications

in September and will narrow the search down to 10 semifinalists for the position, which pays up to \$146,000 a year.

After interviewing the semifinalists, the committee will select five candidates for an on-campus visit, tentatively scheduled for the week of Nov. 28.

"It is a very intense day of interviews," CSU spokeswoman Colleen Bentley-Adler said. "Each one will come to SJSU on individual days."

During the campus visits, students, faculty and staff will have a chance to meet with candidates and to comment on them. Written evaluations can be submitted as well.

According to Christensen, it is the Board of Trustees who will be responsible in making the final decision.

Trustees hope to make a decision before the end of the year.

## Garage: 200 new parking spaces

From page 1

"This is a good deal for guys, groups and car poolers, but for women it's not a good idea — not for women walking," Bonacci said.

Al Schlarmann, vice president of City Park explained that security at the garage consists

of roving patrols who check a number of downtown lots by car or foot. Security is on duty as long as the cashier is there.

"The cashier is on duty from 6:30 a.m. to 1 a.m. and stays later on weekends," he said. "There have been no problems with assaults, but periodically and usually on a mid-afternoon,

a gang or group will steal expensive radios or phones."

Security and safety are everyday concerns on and off campus, and Laura Wells, manager of the traffic department in San Jose, said she doesn't think it would be any different than parking in the garages on campus.

## Network

From page 1

on how funding comes down," said Leland Vandiver, associate vice president for information systems and computing at SJSU.

Vandiver is a member of the CSU presidential task force for intracampus networking, which is investigating the cost of GSEN for the CSU system and SJSU. The task force is also in the process of establishing the computer and software standards for GSEN.

The benefit to SJSU students is it will fund on-campus and intercampus networks and provide money for upgrading the current networking system, Vandiver said.

"Currently, it's difficult for

students to get access to terminals on the Internet," associate librarian Bob McDermid said. "If this [GSEN] would ease access, it would be advantageous."

But McDermid also said since SJSU is already on the Internet, another layer of state bureaucracy is not needed if GSEN is being created just to ease the government's fear about the Internet's unregulated environment.

The operation and maintenance of GSEN central services would probably be handled by a network entity separate from the school system, Vandiver said.

## Mysterious ocean noises

MONTEREY, Calif. (AP) — Twice in the last week, divers off the coast here have heard a massive, heartbeat-like thump sound deep in the ocean.

Today they plan to return to the sea to find out what it is.

Khosrow Lashkari, an acoustics engineer with the Monterey Bay Aquarium Research Institute and Jay Murray, a divemaster for Aquarius Dive Shop at the Monterey breakwater, will dive off Point Lobos today with a hydrophone-equipped tape recorder and a video camera to try to get a better recording of the noise.

About a dozen scuba divers reported hearing the mysterious sound last week and on Tuesday.

Lashkari said MBARI was testing a navigation system on its remotely operated underwater vehicle in Monterey Bay last week when it began receiving a signal at about 25 kilohertz, or 25,000 hertz.

The mysterious sound interfered with the system's operation, but didn't damage it, he said.

On Tuesday Murray and Aquarius manager Justin Dubowitz made an audio and video tape underwater in an attempt to record the sound.

Jim Miller, an electrical engineering professor and expert in underwater acoustics at the Naval Postgraduate School in Monterey, analyzed the tape.

"It was a real interesting signal. I had Jay Murray come down and he said, 'That's it. It's a thump, thump, thump, thump — like a heartbeat sound.'"

Miller said.

Dubowitz, who first heard the sound Aug. 24, described it as "very eerie."

Murray described it as "a very low-frequency vibration ... enough to vibrate your lungs under water."

Whether you're an undergraduate or graduate student, Citibank has a student loan to meet your needs.

If you're short on funds this semester, you're not alone. During the 30 years we've been in the student loan business, students have often told us that they need extra money during the course of the semester to pay for tuition, books, and other expenses. If this sounds familiar, you can count on Citibank, the nation's Number One student loan lender, to provide you with the best financial aid products and services with these important benefits:

- No payments while you are in school
- Low interest rates
- Loans for students of all incomes
- Monthly payments as low as \$50
- No penalty for early repayment
- You don't have to be a current Citibank customer to qualify!

The faster you respond, the faster we can get you the funds you need. Or call us at 1-800-692-8200, ext. 614. Call today, and we'll get an application out to you the next business day!

Call 1-800-692-8200 ext. 614

Yes!

I need a student loan now!

Send me more information and an application for the following Citibank student loans:

☐ All Federal Stafford Loans  
(for undergraduate and graduate students)

☐ Federal PLUS Loan  
(for parents of dependent students only)

☐ Citibank Graduate Loans  
Field of interest

fall 1994 **Redefining Poster Art** catalog no.2

**How to spend your student loan.**

**TITLE:** STUDENT LOAN  
VOLKSWAGEN UNITED STATES  
**SIZE:** 44" X 28.5"  
**ORDER NO.:** 201

Welcome to Be  
the poster. Ever  
today's hottest a

# One-of-a-kind posters. Only found in this catalog. On your wall in a week.

Welcome to Beyond The Wall. The idea is simple: If you like the ad, you'll love the poster. Every semester, Beyond The Wall brings you a great collection of today's hottest ads recreated for the first time as over-sized posters. And this is the only place you'll find them.

**GIVE  
RACISM  
THE  
BOOT.**

We invite you to look through the catalog. If you see a poster you'd like to hang on your wall, give us a call, 24 hours a day, seven days a week, at 1 800 866 1616.

Your posters will arrive in seven to ten days rolled and packed in a protective tube.

Beyond The Wall posters are much more than ads. They're art.

Poster prices go down as you order more:

- \$10 for your first poster.
- \$8.50 for your second.
- \$7 for each additional.

Call 1 800 866 1616 to order today, or mail the enclosed order form.

For customer service call 1 203 877 0406.

◀ At 44% larger than standard 2'x3' posters, Beyond The Wall posters are among the biggest things on campus. You can find the DKNY poster on the next page and the Timberland poster on page 19.

TITLE: **OZONE LAYER**  
CHRYSLER CORPORATION  
SIZE 44" X 28.5"

THE OZONE LAYER  
HAS PROTECTED US  
FOR 1.5 BILLION YEARS.

IT'S TIME WE  
RETURNED THE FAVOR.

All Chrysler Corporation vehicles made  
since January, 1994 have air conditioners  
that use CFC-free refrigerants. Thanks to  
safer substitutes and system redesigns, we are  
years ahead of government guidelines. It's  
just one small step to solving a problem  
that's been hanging over all our heads.
